**Continuation of Disposition of Claims:** Claims pending in the application are 22,24,25,27,28,30,32,34,35,37,38,40,41,43,44,46,47,49,50,52,53 and 55.

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 22, 25, 28, 32, 35, 38, 41, 32, 47, 50, 53 drawn to an electrode active material with formula 1a, classified in class 429, subclass 121.
  - II. Claims 24, 27, 30, 34, 37, 40, 43, 46, 49, 52, 55, drawn to an electrode active material with formula 2, classified in class 429, subclass 213.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group II have cyclic structures attached to the alkylene backbone which indicates that a hydrogen atom cannot be attached to the alkylene backbone. The subcombination has separate utility such as Group I with R<sup>5</sup> and R<sup>6</sup> as a hydrogen atom.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in

Art Unit: 1745

accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Claims 32 and 34 are generic to the following disclosed patentably distinct species:

- a. Applicant is required to elect a specific X atom, a specific R<sup>1</sup> to R<sup>4</sup> group, R<sup>5</sup> to R<sup>6</sup> group as recited, for example, in claim 32.
- b. Applicant is required to elect a specific R<sup>1</sup> to R<sup>4</sup> and R<sup>7</sup> to R<sup>10</sup> group, R<sup>5</sup> to R<sup>6</sup> group as recited, for example, in claim 34.
- c. Applicant is required to elect a specific range of carbon atom as recited, for example, in claims 28 and 30 respectively.
- d. Applicant is required to elect a specific negative active material as recited, for example, in claims 44, 46, 32, 55.

The species are independent or distinct because they are different compounds with different properties. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected

Art Unit: 1745

consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

4. A telephone call was made to Michael Fogarty on 12/4/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

Art Unit: 1745

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helen O. Chu whose telephone number is (571) 272-5162. The examiner can normally be reached on Monday-Friday 8am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on (571) 272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
